DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-4, drawn to isolated polypeptide comprising the amino acid sequence represented by SEQ ID No: 2.

Group II, claims 5-8, drawn to isolated polynucleotide, an expression system capable of producing a polypeptide comprising the amino acid sequence represented by SEQ ID No:1, a process of producing a polypeptide.

Group III, claim 9, drawn to fusion protein of an isolated polypeptide comprising the amino acid sequence represented by SEQ ID No: 2.

Group IV, claim 10, drawn to an antibody raised against an isolated polypeptide comprising the amino acid sequence represented by SEQ ID No: 2.

Group V, claim 11, drawn to a method for screening to identify compounds that stimulate or inhibit the function or the level of an isolated polypeptide comprising the amino acid sequence represented by SEQ ID No: 2.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-V appears to be an isolated polypeptide comprising the amino acid sequence represented by SEQ ID No: 2 or at least 95% identical to SEQ ID No. 2.

Miyamoto et al. (Cited in the IDS filed March 03, 2002) disclose an isolated polypeptide comprising an amino acid sequence that is 93% identical to the isolated polypeptide comprising the amino acid sequence represented by SEQ ID No: 2; therefore, the technical feature linking the inventions of Groups I-V does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

Accordingly, Groups I-V are not so linked by the same or a corresponding special technical feature as to form a single inventive concept.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance,

Art Unit: 1653

whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

A telephone call was made to Anthony J. Zelano on August 31, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1653

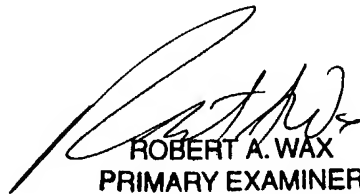

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
